Manufacturers Declaration

illbruck OT015 EPDM ADHESIVE
illbruck CT113 EPDM CONTACT ADHESIVE

These adhesives are manufactured to an ISO 9001 quality system. Each production batch is tested and approved to an agreed manufacturing specification prior to release and delivery.

We herewith can confirm that the formulation of the products OT015 and CT113 are unchanged since their introduction. The technical parameters and performance remain unchanged.

EPDM membranes are regulated within EN 13984 *Flexible sheets for waterproofing - plastic and rubber vapour control layers - definitions and characteristics*.

The Standard does not specify any threshold values about shear resistance or similar mechanical properties affected by adhesive connections.

As there is no European standard for the legal implementation of an EPDM adhesive in place, Tremco CPG carries out application-related test series to prove the durable performance of the adhesives in practical applications (e.g. ITB test report LZM00-1281/18/R11NZM).

Your Tremco CPG consultant is available at any time for further information.

Kind regards,
